

# Anya L. Keller

Tel: (646)-206-8789

Email: [alkeller@bu.edu](mailto:alkeller@bu.edu)

Portfolio: [anyakeller.github.io/portfolio](https://anyakeller.github.io/portfolio)

Dynamic mechanical engineer driven by curiosity and energized by innovation. Delivers efficient solutions rooted in mechanical design and manufacturing experience to meet client needs.

---

## EDUCATION

<b>Boston University</b> <i>Mechanical Engineering, Manufacturing Concentration</i>	September 2021 - Present
<b>Columbia University</b> <i>Full-Stack Website Development Bootcamp</i>	July 2019 - January 2020
<b>Stuyvesant High School</b> , New York, NY	Class of 2017

---

## WORK EXPERIENCE

<b>Machine Shop Laboratory Assistant</b> <i>BU EPIC</i>	September 2021 - Present
Boy 22A Injection molding machine - maintenance, documentation, and demonstrations. Part manufacturing and usage instruction - CNC and manual mills, lathes, waterjet, 3D printers, and various shop tools.	
<b>Product Development Intern</b> <i>va-Q-tec AG Würzburg, Germany</i>	June 2023 - August 2023
Thickness Measurement Device - Used to improve vacuum insulation panel thermal conductivity calculation accuracy and repeatability. Features included: automatic data recording, testing procedure redesign with consideration for DIN standards, and measurement mechanism prototyping. Utilized Gantt chart project planning and morphological analysis.	
<b>Junior Engineer</b> <i>Kite and Rocket Research</i>	November 2018 - August 2021
Responsible for designing, planning, prototyping, CAD, procurement, manufacturing, and assembly of the following: 8-Foot "Stomp Rocket" for Chicago Toy and Game Fair      CV Ping-Pong Ball-Tracking Robot Vacuum Splint to Treat Peyronie's Disease      Mill Spindle Power Switch Automatic Safety Cover	
<b>Web Dev Bootcamp Teaching Assistant</b> <i>Columbia University</i>	October 2020 - April 2021
<b>Engineering Intern</b> <i>Kite and Rocket Research</i>	Summer 2016 and 2018
Machine Shop Compressed Air Delivery System	Repair of Arduino-Controlled Window Plotting Robot
<b>Primary Machinist</b> <i>StuyPulse Robotics Team 694, FIRST Robotics Competition</i>	Summer 2016 and 2018
Manufactured key robot parts from drawings and CAD files, and directed and trained students on the usage and upkeep of mills and lathes. Led prototyping teams and worked on robot design and construction.	

---

## SKILLS

<b>Design</b> CAD SolidWorks, Autocad, Creo, Onshape <b>CAM</b> GibbsCAM, Fusion 360, SolidCam	<b>Machining and Fabrication</b> General Shop Manual Mill and Lathe Work Waterjet Cutting Laser Cutting	<b>Computer Science</b> Languages MATLAB, C, Python, Java  <b>Database Management</b> SQL, MongoDB, Firebase
<b>Robotics</b> Arduino Motor control (DC, stepper, servo) Computer vision: OpenMV, PixyCam	<b>Additive</b> 3D Printing (SLA & FDM): Formlabs, Stratasys, MakerGear, Cubicon Plastic Injection Molding: BOY 22 A	<b>Workflow</b> GitHub, TravisCI, Kanban, GitLab

---

## INTERESTS AND SECONDARY SKILLS

<b>Full Stack Website Development</b> Github Pages, Heroku JavaScript Node.js, React.js, Express.js, NPM PHP WordPress	Python Flask <b>Human Languages</b> Conversational: Italian and German Additional: Mandarin Chinese, French, Hebrew
